

ICICI Prudential Multi-Asset Fund

An open ended scheme investing in Equity, Debt and Exchange Traded Commodity Derivatives/ Units of Gold ETFs/ Units of REITs & InvITs/ Preference Shares.

About the Scheme

ICICI Prudential Multi-Asset Fund is an open ended scheme which invests in equity & equity related instruments for capital appreciation and other asset for income generation. The various asset classes in which the scheme can invest are:

- Equity
- Debt
- Exchange Traded Commodity Derivatives/ Units of Gold ETFs/ Units of REITs & InvITs/ Preference Shares.

Current Investment Approach

Equity:

- *Net Equity level:* In the range of 60%-80% based on an in-house equity model and fund manager view
- *Sector allocation and stock selection:* The fund manager would adopt a counter-cyclical approach to investing by remaining underweight in those sectors to which the larger market holds an elevated exposure. The fund manager would invest in those stocks that have a better risk-return trade off as compared to debt and arbitrage positions.
- *Flexi cap:* The scheme shall invest across market capitalisation based on favourable valuation across the segments.
- *Derivatives exposure:* The scheme may also invest in stock and index futures with a view to mitigate downside risks.

Debt:

The Scheme will invest a minimum of 10% of total assets in debt securities and money market instruments with an aim to generate accrual income and potential capital appreciation.

Gold/Gold ETF/units of REIT & InvITs:

The indicative allocation towards Units of Gold ETFs/ Exchange Traded Commodity Derivatives would be 10-30% and towards REIT & InvITs would be 0-10%. The Scheme's exposure to Gold and Gold ETF would depend on the macro-economic outlook. Exposure may be added in a rising interest rate scenario with an aim to provide hedge against inflation and bring stability to the portfolio. Exposure to REIT & InvITs would be added as and when a good opportunity arises.

Why ICICI Prudential Multi-Asset Fund?

- The scheme is suitable for investors who are looking for diversified exposure across asset classes
- The portfolio works in a three-fold manner providing the agility of an equity stock, regular income through debt instruments and gold acts as a good hedge against inflation.
- Investors who wish to opportunistically invest across multiple asset classes could consider investing in this scheme with an investment horizon of 5 years or more.

*IDCW – Income Distribution cum Capital Withdrawal Option. Payment of IDCW is subject to availability of distributable surplus and Trustee approval. Pursuant to payment of IDCW, the NAV of the scheme falls to the extent of IDCW payout. When units are sold and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains is credited to an Equalization Reserve Account and which can be used to pay IDCW. IDCW can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains. In case the unit holder has opted for IDCW payout option, the minimum amount for IDCW payout shall be 100 (net of statutory levy, if any), else the IDCW would be mandatorily reinvested. IDCW Payout -Payout of Income Distribution cum capital withdrawal option; IDCW Reinvestment - Reinvestment of Income Distribution cum capital withdrawal option.
